

## CHIRAG ENVIRONMENT PROTECTION ASSURANCE

R.P Infosystems is committed to environment management and protection. Our product and R&D team and our manufacturing facilities are constantly gearing up to ensure that our products are compliant with global environment safety standards.

Chirag manufacturing facilities are fully ISO 14001:2004 compliant. We are also the first of its kind IT organization to adapt OHSAS 18001:2007 standards for health & safety.

We are committed to the **EPR/IPR policy** framework and our commitment to environment management is envisaged in our continuously evolving E-waste management program and our reliance on Energy Star compliant products. Chirag's range of PC's targeted at our end users is suggestively known as the EcoEdge series keeping in mind our commitment to Ecofriendliness. Our EcoEdge and NuEdge series of products can be considered as true GREEN PC's since we are constantly adopting

- **ISO 14001:2004** evolutions in environment friendliness.
- Concern over end user safety.
- Comprehensive E-waste management policy clearly enunciating disposal mechanisms in line with EPR/IPR with external auditing procedures to ensure correct recycling.

R.P Infosystems is working towards moving from RoHS compliance to getting our products RoHS certified. We are working with industry leading consultants in this area to achieve this goal. Our manufacturing lines ensure environmentally safe products for our customers. We are striving to achieve restriction / elimination of Lead , Cadmium, Mercury, Hexavalent Chromium, PBB's and PBD's in line with RoHS Directives. Chirag products eventually strive to ship with a MAP (**Manufacturers Assurance Policy**) assuring a safe and environment friendly experience for the user.
